

VELOCITY:

Lighting The Way On All Things IT

IT Support: For Every Stage of Growth

At Velocity, we offer comprehensive IT support and fully managed IT services tailored to meet the unique needs of businesses at every stage of their growth journey. From traditional helpdesk services to fully managed IT solutions, our expertise guides you through the realms of digital transformation, workplace efficiency, and heightened security. We specialize in equipping our clients with customized operational setups for the Modern Workplace, maximizing productivity to fuel business growth.

IT Security: Safeguarding Your Business

Velocity leads with a security-first mindset, fortified by a deep understanding of the latest cybersecurity threats that can impact your business. Our managed Cybersecurity services and solutions are meticulously crafted to shield your business from potential hacker attacks, ensuring your peace of mind. We invest the time to understand your unique challenges and offer robust solutions to protect your business from Internet threats that are beyond your control. Whether you are just embarking on your business journey, scaling up, or striving to meet the most stringent compliance and regulatory requirements, we offer tailored cybersecurity services and training to fortify your business.

IT Staffing: Unearthing IT Talent

Velocity shines a spotlight on IT talent, operating as senior IT professionals ourselves, we remain at the forefront of the industry, keeping pace with the latest trends in digital transformation. Additionally, we possess the experience and proficiency required to manage legacy systems with finesse. Our approach to staffing and resourcing is tailored to fit the individual needs of each client. Our specialist team is dedicated to identifying and sourcing hard-to-find, high-caliber IT professionals, leveraging their skills and expertise through our extensive networks and relationships. We offer a range of engagement options, including Permanent, Contract, Consignment, Secondment, and Outsourcing for IT projects.

Business Solutions

Velocity takes the guesswork out of how to approach adopting the Modern Workplace with a tailored suite of business solutions and advice that equips businesses to transform their IT to operate seamlessly using cloud-based tools and support latest hybrid work arrangements. Technology, coupled with expert advice, makes collaboration and communication easier than ever. But the hard part is making the right decisions on which tools to use, getting everything set up correctly and ensuring easy access for users. We'll take time getting to know you and your business needs and aspirations to offer bespoke solutions.

Why choose Velocity

We lead with a security mindset, particularly in highly regulated industries.

We save you time and money while helping your business grow.

We believe all business is personal; we totally get AI but we're not robots.

We are committed to finding smarter ways of working and always looking ahead to adopt latest technologies.

We've got your back – striving for 'always on', 'all systems go'.

About

Founded in 1998, **Velocity** provides IT support, security and staffing services for customers at every stage of growth helping businesses become more efficient, effective and secure. Headquartered in Hong Kong, Velocity has expanded in recent years with **StatusRed** and **City Computing** joining the group to serve local and international clients with a growing presence across Asia Pacific.
