ABOUT DATA WORLD COMPUTER & COMMUNICATION LTD

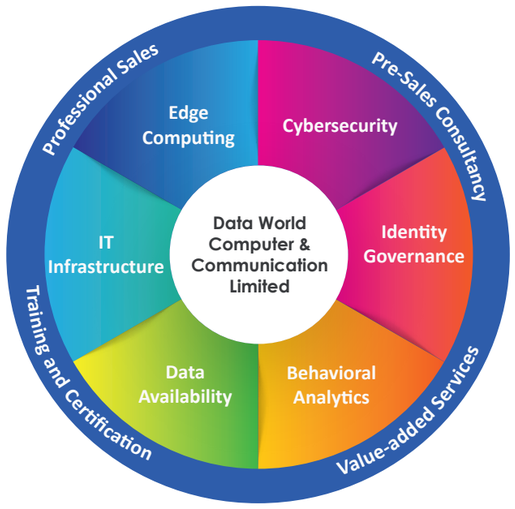
Data World Computer & Communication Ltd. (Data World C&C) is a leading value-added IT distribution company, which was established in 1983. Our headquarter is based in Hong Kong. We have Support Center in a number of locations, including Hong Kong, Macau and Shenzhen in Mainland China. We focus on delivering customers the professional technology services, IT business management and solutions with our comprehensive range of products, and through our valued channel partners.

Data World C&C's mission is to empower customers' business growth through the advancement of quality solutions and services.

With our full confidence in offering professional IT knowledge, we have built a solid network between businesses and channel partners in Hong Kong, Macau and Mainland China.

With over a few decades of experiences in IT industry, we specialize in 6 key areas of networking and security solutions.

We offer a full range of market leading products with our professional services that equip enterprises to maintain their daily operations and optimize their business processes to deliver better performance and convenience.



MULTI-TIERED NETWORK SECURITY SOLUTIONS

Network security solutions play a significant role to protect enterprises from inside network to outside network. As rising new types of attacks and threats, enterprises are concerned about protection in varied areas.

Data World C&C's network security solutions cover from endpoint to a complete infrastructure, either on-premises based or cloud-based.

Solutions include:
- Data Loss Prevention (DLP)
- DDoS Protection and Mitigation
- Email Security
- Endpoint Detection & Response (EDR)
- Identity and Access Management
- Next-Generation Firewalls
- Secure Remote Access Gateway
- Security Information & Event Management (SIEM)
- Threat and Vulnerability Management

ADOPTING CLOUD TECHNOLOGY TO PROTECT FROM CYBER ATTACKS

Cloud computing today allows hardware and software products to co-exist remotely and flexibly. By accessing and managing network, database, storage and applications over the internet, the companies achieve to securely implement 'Anytime and Anywhere' business model.

Our cloud-related solutions include:
- Cloud Access Security Broker (CASB)
- Cloud Security Gateway Protection
- Cloud DDoS Protection
- Cloud Web Application Firewall
- Vulnerability Management in the Cloud
- API-enabled Cloud Access Control

MAINTAINING PERFORMANCE TO ACCELERATE BUSINESS GROWTH

Nowadays, businesses are facing challenges to handle scalable traffic that requires fast and reliable response from any device and anywhere.

With Data World C&C, we equip businesses with smarter technologies and help them maintain daily operations. Our solutions and services simplifies the procedures that provide end-to-end capabilities of deployment and management.

Solutions include:
- Network Optimization
- Network Security Management
- Analysis and Reporting

Data World C&C can offer solutions:
- Load Balancing
- Bandwidth Optimization & Acceleration
- IP Address Management (IPAM)
- Network Access Control (NAC)
