

About BECHELON

BECHELON was founded in 2006 and has been focusing on providing Enterprise Solutions for SMEs since then. Together with our sister company Coreminder, we are both Microsoft Gold Certified Partner and Oracle Partner Network EBS Partner. We are also an authorized dealer for an Australia HR Software name Employee Connect. We have been assisting many local clients in developing their Digital Transformation strategy, implementing enterprise solutions, and developing business applications; to meet with their ever-changing challenging business environment.

The solutions which we provide to our customers include: ERP, Finance System, Supply Chain System, CRM, Membership, Human Resource, RPA, Business Intelligence, etc. With our experience and expertise in various industries like Manufacturing, Trading and Distribution, NGO, and Retailing sectors, BECHELON quickly becomes one of the key Enterprise Solutions Providers with 35+ Staffs in Hong Kong, Taiwan, and China. BECHELON also develops customized business applications for customers special needs.

Combining Software, Development, Implementation and Support service, we provide skilled, one on one assistance to companies to grow and prosper. We study our customers' challenges and provide them with the latest best of breed software through our Software Partner Network.

In the post COVID era, Digital Transformation is almost a must. Single software vendor has proven to be challenging in the New Economy since business today are to be conducted with an Omnichannel mindset – both inside and outside of the corporation. Traditional approach on delivering projects in the new Digital World are proved to be challenging (Small Scale vs Large Scale). One will need to identify the values in various software packages according to their own business needs. Combing 'best fit' software and integrating them with both the internal and external systems become the new keys for business success. BECHELON's extensive knowledge of packaged software, in depth technical development skillset, and the knowledge of the New Economy Industries are invaluable in nowadays' Digital Transformation Process.

Our Mission: To assist our customers on their Digital Transformation Journey by picking the right software(s) in the most cost-effective way. We assist our customers to do projects and use software out of Customers' necessity which are best fit to their business.

Our Promise: Bring to our customers the best price performance solutions as our core mindset and implement results-driven projects.

Local Support

Our teams are based in Hong Kong, Taiwan, and China. We can communicate with our clients fluently and accurately. We are well experienced in cooperating with clients in the area and they can perform on-site work outside of Hong Kong if needed.

Technical Director – Mr Chris Huang

Qualifications:

- Imperial College London
Master of Science in Computing Science
 - King's College London
Bachelor of Engineering Degree in Electrical and Electronic Engineering
-

Mr. Chris Huang has extensive experience in implementing large scale projects and with over 20 years of experience in IT project management in various industries. He has led teams in the successful implementation of systems to meet stringent customer requirements. His strength is technical development, architectural design, customize and system integration of projects with structured development methodologies and management of system development resources.

Chris has a very good track record of managing project to success and has profound industrial knowledge. He has led a team to tailor-make, construct and implement a system for Garment and Laundry manufacturing of the company's own proprietary ERP system which included Sales Management, Supply Chain Management, Management Information System, Production Management and Accounting Systems Integration. He has also tailor-made and implemented an ERP system for a Luxury Glass Manufacturing Company running business in China and Hong Kong as well. It was including Sales Management, Warehouse Management System, Supply Chain Management and Management Information System.

Others includes a project for the implementation of Microsoft Dynamics CRM and ERP system for a luxurious, high end shopping mall in Hong Kong Island; and the implementation of Microsoft CRM system for a multi-brand apparel retail group (I.T Apparels Limited), which owns several Hong Kong brands as well as distributing European and Japanese brands. He had also managed the implementation of Microsoft ERP system for Maxim's Caterers Limited, the company operates over 1,000 outlets in Hong Kong, China, Cambodia, and Vietnam. These include bakeries, fast food shops restaurants and Starbucks coffee shop licenses. Chris has the experience to manage the complexity due to the needs of communication with various external parties during any stages of system development, and postproduction enhancement projects.

Beyond commercial engagements, Chris believes that there is an obligation for the IT industry to play a more important role in Hong Kong's transformation into a digital business economy. That belief has eventually led him to join the Federation of Hong Kong Industries (FHKI) and to participate more actively in public activities in relation to revitalizing Hong Kong industries. Apart from sitting in the General Committee of the FHKI when he was previously the vice chairman of Hong Kong Information Technology Industry Council of the FHKI, he has also chaired the Smart City sub-committee of the Innovation and Technology Development Committee, as well as serving as an advisory member in the Consultative and Advisory Panel (CAP) of Hong Kong Internet Registration Corporation Limited (HKIRC).
