FUNCTIONAL MEDICINE – DECODING BIOLOGICAL SIGNALS FOR PROACTIVE HEALTH

Restoring wellness by identifying and addressing root causes of disease

Functional Medicine		Conventional Medicine
<ul style="list-style-type: none">• Identify root causes• Restore physiological balance	GOAL	<ul style="list-style-type: none">• Diagnose diseases• Control symptoms
Personalized interventions: <ul style="list-style-type: none">• Precision nutrition• Hormonal optimization	METHOD	Standardized treatments: <ul style="list-style-type: none">• Pharmaceuticals• Surgery
Whole-body system interactions (e.g. Gut-Brain Axis)	FOCUS	Single organ/system
Functional biomarkers: <ul style="list-style-type: none">• Hormonal profiles• Oxidative stress markers	TESTING PRIORITY	Pathological indicators: <ul style="list-style-type: none">• Tumor markers• Disease-specific diagnostics
Collaborative co-creation of health plans	CLINICIAN-PATIENT DYNAMIC	Doctor-directed decisions

CHRONIC DISEASE INTERCEPTION SYSTEM

WHO: "70% of global deaths are from preventable chronic diseases"

7

SDF HEALTH REPORT

Personalized nutraceutical and lifestyle recommendations based on biomarker profiling

Fatty Acids Profile

Quantitative analysis of multiples saturated/trans-fatty acid biomarkers. Assess cardiovascular inflammation & neuronal function. Optimize cellular membrane integrity. Precision lipid-nutrition strategy formulation

Food Intolerance Profile - 220 Items

Industry's most extensive IgG-based food antigen test covering dairy, grains, seafood, etc. Identify "hidden triggers" of leaky gut & chronic inflammation. Alleviate IBS, eczema, and migraines.

Digestive Health Assessment*

Combines gut microbiome, enzymatic activity, and intestinal permeability analysis. Target bloating/constipation/malabsorption causes. Customize gut-repair protocols

Nutrition and Antioxidants

Comprehensive evaluation of key antioxidants (Glutathione etc.). Diagnose oxidative stress levels and delay aging processes. Reduce chronic disease risks

Salivary Hormones Profile

Cortisol & sex hormone rhythm analysis. Resolve stress disorders & menopausal symptoms. Address adrenal fatigue.

Heavy Metal Toxicity Screening*

Multi-matrix analysis (blood/urine/hair) of lead, mercury, arsenic, cadmium bioaccumulation.

Full Profile of Vitamins

Serum quantification of essential vitamins (A, B-complex, C, D, E, K). Identify deficiencies/toxicity. Personalize supplementation and enhance metabolic function.

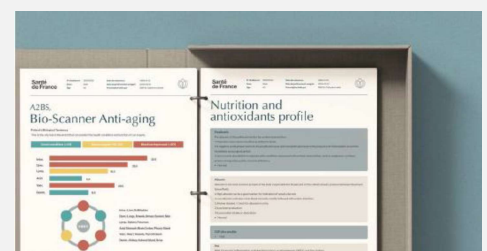

Comprehensive Immunity Profile

Integrates innate/adaptive immunity markers (Ig subsets, lymphocyte subsets, cytokines). Identify immune dysfunction zones and guide evidence-based immunomodulation.

Cardiovascular Profile

Predicts subclinical cardiac risks beyond standard lipid panels.
