Hong Kong has established a strong global position in green and sustainable finance. Meanwhile, emerging markets across Asia are ramping up their efforts to fight climate change. There are immense needs and opportunities for global energy systems to transition towards low carbon technologies.

This session will explore how Hong Kong can leverage its financial power, engineering excellence, socio-cultural interconnectivity and economic strengths to enable low-carbon transition in emerging markets across Asia.

Join us for a discussion about how Hong Kong can do to stay ahead of the curve
