Why Us?

Securall is a premier security services group based in Hong Kong, specializing in armored transportation, high-value asset protection, and integrated security services. Our management team brings over a century of collective experience in secure logistics and security operations. We are committed to safeguarding the assets and trust of global financial institutions, corporations, and government entities.

Our Services

Armoured Security & Global Transport Solutions

Safeguard your high-value assets with our armoured transportation services. We offer secure, insured logistics for cash, bullions, and valuables cargo—locally and globally. With GPS tracking, trained personnel, and compliance with international standards, we ensure safe, timely delivery across borders.

Guarding Service Solutions

Protect your property, people, and assets with our professional guarding services. We offer trained security personnel for commercial, residential, and event settings—available for long-term or ad hoc needs. Services include access control, mobile patrols, alarm response, and VIP protection. Reliable, discreet, and tailored to your security requirements.

Private Safe Vault for Safe Deposit Boxes

Secure your valuables with private safe vaults offering high-grade protection and customizable box sizes. Ideal for storing jewelry, watch, documents, and more. Featuring 24/7 surveillance, security access, and bank-level security—available in trusted Hong Kong locations.

IT & Blockchain Security Solutions

Protect your digital assets with advanced IT and blockchain security. We offer AI-driven threat detection, zero-trust architecture, and smart contract audits to secure networks, data, and decentralized platforms. Scalable, compliant, and future-ready—our solutions are built for today's threats and tomorrow's innovations.

CCTV Design, Planning & Maintenance Solutions

We provide end-to-end CCTV services—from strategic system design and layout planning to ongoing maintenance and support. Our experts conduct thorough site surveys, optimize camera placement, and select the right equipment to ensure maximum coverage and reliability. With regular system health checks, firmware updates, and performance monitoring, we keep your surveillance running smoothly and securely.
