ATTA TECHNOLOGIES

ATTA Technologies, a SportsTech company, was founded to revolutionise the world of sports through technology. The company brings artificial intelligence (AI)-powered data analytics into sports. Its mission is to use technology to quantify sports training, create an improved and enhanced sports training experience for users, and use big data to discover new and upcoming athletic talent. Its flagship product, the Progress Tracker, is a fitness

system with proprietary technologies that collect, analyse, and quantify sports data. The recording of videos paired with AI-powered analytical data can help users further develop their skills over time. The Progress Tracker has a library of exercises, including standardised fitness and sports-specific exercises.

WildFaces' patented "on-the-move" artificial intelligence (AI)-based analytics system, WildAI, provides video, sound, and smell analytics from moving sensors or cameras on drones, moving robots, and body-worn cameras. These systems have been implemented on numerous government and commercial sites worldwide.

Applications range from anonymised tracking with privacy protection and traffic congestion management to sound and smell analytics.

WildAI is infrastructure-light, which requires minimal data training without labelling, deep learning or graphics processing units (GPUs). It is computing-light and can be speedily deployed. It operates in real-time even when the sensor is "on-the-move".
