The First National Patent Infringement Case was Tried at Intellectual Property Court in Beijing

- *At 9:30 on December 16, 2014 , the first ever patent infringement case went on trial at the Beijing Intellectual Property Court after its establishment. Our firm presented at the court as the representative of the third party.*
- *Chi Su, the chief justice of Beijing Intellectual Property Court as the presiding judge. Ying Jiang and Jun Yi as the Judge Group.*
- *Broadcast by CCTV News*
- *Broadcast by Beijing Court website*
- *Broadcast by more than 50 medias including Beijing TV Station*

GREE VS AUX Utility Model Invalidation

- In 2017, due to a utility model patent "motor steering mount", two air conditioner giants GREE and AUX heats up their tension. In the end, Ningbo Intermediate People's Court made a first-instance judgment on the case, and believed that the air conditioner model KFR. -35GW/(35573) FNAa-A1 manufactured and sold by GREE infringes AUX's utility model patent titled "Motor Steering Mount", patent number ZL201520143902.0, and caused huge economic losses. Ruling GREE to immediately stopped manufacturing, selling, and promised to sell infringing products, and destroyed stock infringing products, and compensated AUX for economic losses of 10 million RMB.*
- Gree's layout in the field of high-end air conditioning is facing major adjustments, and the huge economic value hidden behind it is far more than 10 million RMB.*
- On January 14, 2019, the Patent Reexamination Board made made a decision on the review of the invalidation request, declaring that the patent right of the utility model was invalid.*

MOBIKE Patent Invalidation

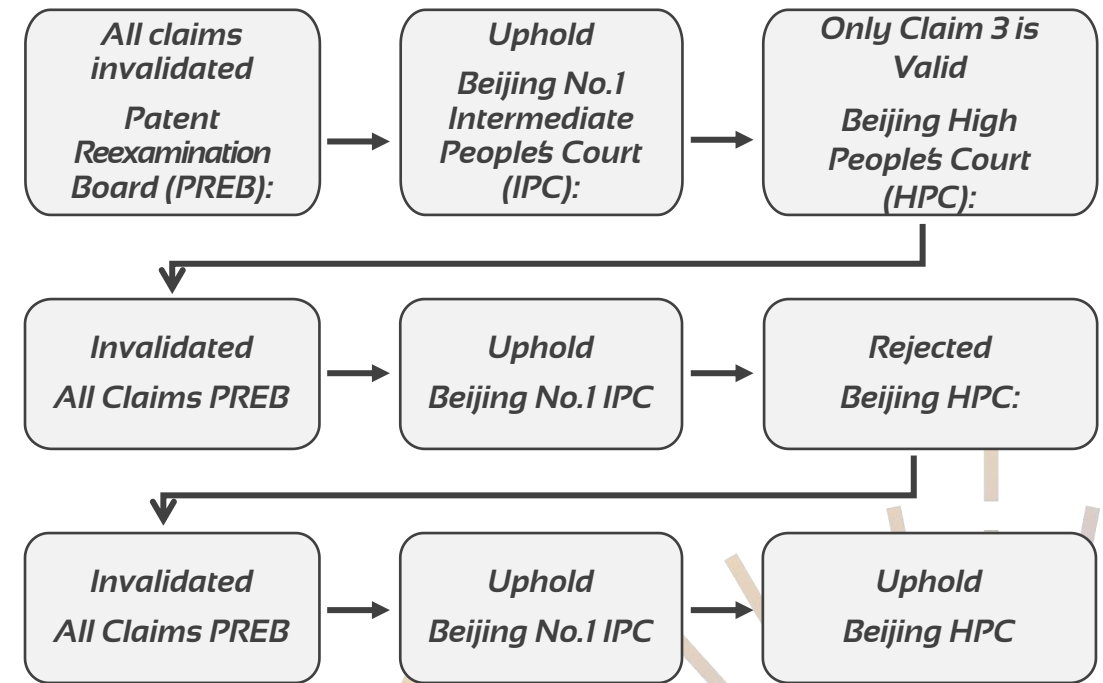

- On September 27, 2017, the Patent Reexamination Board organized a public hearing on this case and it is the sixth case in which the Patent Reexamination Board organized the public hearing of major cases. Sunshine IP International was selected to represent Mobike in front of the court.
- On November 1, 2017, China IP News reported the entire case.
- On December 26, 2017, the Patent Reexamination Board made a decision on the invalidation request and declared that all patent rights were unpatentable.
- Mobike case is selected as 2017 Beijing Top Ten Classic Patent Administrative Litigation and 2017 Annual Top Ten Patent Re-examination & Invalidation

Invalidation and Litigation cases

*Designated as the Saber for
People's Liberty Army Honor Guard on September 26, 1992.*

Invalidation and Litigation cases

Six Times Remain Patentable Before Unpatentable

The Key Evidence to Invalid Listed Companies Core Pharmaceutical Patents

- At the beginning of 2016, Guangdong Zhongsheng Pharmaceutical Co., Ltd. sued Sinoways Pharmaceutical Inc. for its production and sales of compound thrombosis tablets and infringed its core medicine patent number: 2009102158150.
- Sunshine IP International represented the defendant, Sinoways Pharmaceutical Inc., in the Guangzhou Intellectual Property Court and planned to file an invalid declaration with the Patent Reexamination Board of the State Intellectual Property Office on the accused patent.
- Before Sunshine filed an invalid declaration on the accused patent, there were six invalid declarations filed by other representatives on the accused patents and all of them remain patentable.
- Sunshine's teamwork on patent search, analysis, and improved important evidence to form a perfect evidence chain. The Patent Reexamination Board declared the patent was invalid in June 2017 (Decision No. 32038).
- According to the current judicial interpretation, the Guangzhou Intellectual Property Court ruled to reject the claim of the plaintiff, Guangdong Zhongsheng Pharmaceutical Co., Ltd.

U.S. Biological Gene IDEC Patent Litigation for the Treatment of Moderate and Highly Non-Hodgkin's Lymphoma with Anti-CD20 Antibodies

- *Roche's American biological gene IDEC, which is owned by Roche, is the oldest independent biotechnology company and Fortune 500 company in the world. The invalidity of the accused patents has far-reaching significance for the China domestic antibody pharmaceutical industry.*
- *This case involves the determination of unexpected technical effects in patent administrative litigation. The court of first instance of the Beijing No. 1 Intermediate People's Court ruled to revoke the part of the decision to appeal that was based on the claim 2 to continue to maintain the validity of the involved patent. Beijing Higher People's Court upheld the verdict.*

Invalidation and Litigation cases

Sunshine Helps Zhuhai CosMX Win 105-Million-RMB Yuan Patent Dispute Against ATL

- The lithium battery patent invalidation dispute between Zhuhai CosMX Battery Co., Ltd. and Amperex Technology Limited (ATL), represented by our firm, was successfully concluded. The China National Intellectual Property Administration issued the No. 567986 invalidation review decision, declaring all the rights of ATL's utility model patent "Lithium Ion Battery" (Patent No.: 201420030319.4) invalid.
- Previously, ATL sued Zhuhai CosMX in the Fujian Higher People's Court on the grounds of alleged infringement of the said patent, claiming 105 million yuan in compensation, and later withdrew the lawsuit (Civil Ruling (2023) Min Min Chu No. 4). During the case representation, our firm, relying on its in-depth understanding of patent laws, solid evidence sorting capabilities and precise legal arguments, successfully promoted the invalidation of the involved patent. This not only built a solid defense line for the client in major IP disputes but also demonstrated the practical capabilities and safeguarding level of our professional agency team in complex patent cases.

Sunshine Escorts U.S. Enterprise to Win 100-Million-Yuan IP litigations

- *As the agent for **U.S.-based Catalytic Distillation Technologies**, Sunshine successfully represented it in suing **Luoyang Zhida Petrochemical Engineering Co., Ltd. and Dongying Yatong Petrochemical Co., Ltd.** in the Shandong Higher People's Court over **patent and trade secret infringement**, with a litigation claim of **100 million yuan**.*
- *The case involved infringement of three patents (200510091993.9, 03813341.5, 038135736) and trade secret infringement. In response to the invalidation requests filed by the opposing party with the CNIPA against the involved patents, Sunshine, relying on comprehensive investigation, in-depth technical and legal analysis, formulated and implemented precise invalidation defense and litigation strategies, successfully maintaining the validity of the patents three times. Eventually, the court ordered Luoyang Zhida Petrochemical Engineering Co., Ltd. to pay over 7 million yuan in economic compensation.*
- *The cases were selected into the 50 typical cases of the Supreme People's Court in 2016 due to the professionalism of the agency strategy and the typicality of the case result.*

*Sunshine's Precise Strategy Helps Daqing Sanju Win Patent Invalidation Case Against the German Chemical Giant **BASF***

- *As the agent of Daqing Sanju Energy Purification Co., Ltd., Sunshine successfully promoted its request for full invalidation of BASF SE's "Method for Preparing Polymethylol Compounds" (Patent No.: 200910258005.3).*
- *In late 2017, after being entrusted by the client, Sunshine got involved in this patent dispute involving a multi-billion-yuan annual market, acting as the agent to request the invalidation of the patent. With in-depth analysis of technical details and precise application of legal provisions, on November 6, 2018, **the Patent Reexamination Board ruled that all 36 claims of the involved patent were invalid.** This resolved potential infringement litigation risks for the client and **won 5 million yuan worth of rights protection.***

Turning the Tide: Everpro vs. Cosmi – A Case of Strategic Patent Invalidation

In October 2020, Everpro received a notice of a Section 337 Investigation, initiated by Cosmi, a U.S.-based enterprise in the fiber optic communication technology sector. Cosmi alleged that Everpro had infringed upon its intellectual property rights, casting a shadow over Everpro's operations.

Following a comprehensive internal review of the relevant products, Everpro firmly maintained that there was no infringement of Cosmi's patents. To respond effectively, Everpro entrusted Sunshine with a critical task: to initiate patent invalidation proceedings against the Chinese counterpart patents of Cosmi's patents involved in the Section 337 Investigation.

As a result, all the claims of the Chinese family patents were invalidated, which forces Cosmi adjusted its strategy. Prior to the scheduled hearing, Cosmi voluntarily withdrew the case, and the U.S. International Trade Commission subsequently terminated the Section 337 Investigation against Everpro.

Invalidation and Litigation cases

Design patent Invalidation for "vibration massage gun"

The ZL201830409294.2 design patent for a "vibration massage gun" soared to global fame, earning acclaim from sports celebrities and fitness aficionados alike.

The client, selling products on Taobao, became the target of repeated infringement lawsuits over alleged "copycat" items, with cumulative claims surpassing tens of millions of yuan.

Sunshine help the client invalidate multiple related patents owned by the plaintiff. This pivotal development prompted the plaintiff to withdraw all litigation case voluntarily, bringing the dispute to a conclusive end.

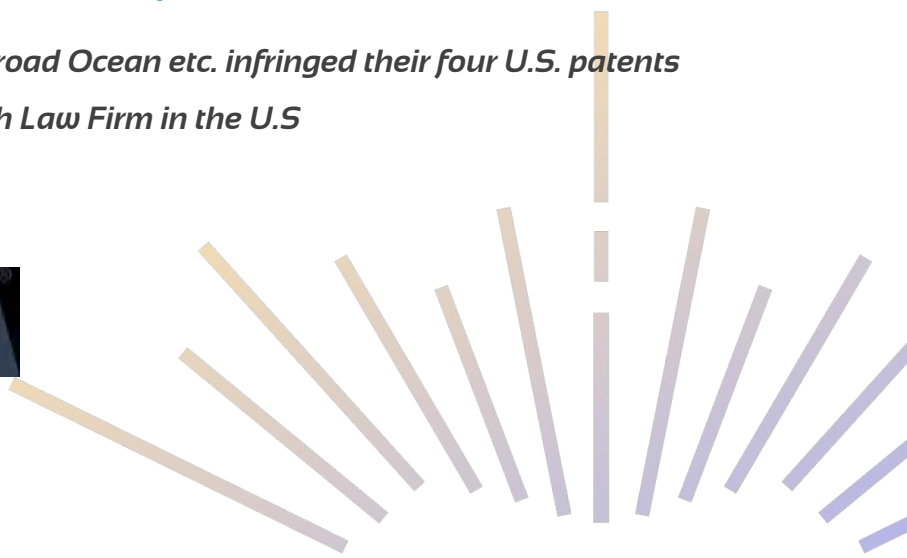

Sunshine invalidated a design patent using less than 2-second NBA game footage plus official promo images to prove prior public use, so as to defeat the patentee's defenses for Non identical disclosure and Grace period for Non-loss of Novelty. The invalidation was upheld in first-instance admin litigation. Expertise turns challenges to victories.

Regal Beloit America, Inc. et al v. Zhongshan Broad Ocean Motor Co., Ltd. et al

- *Regal Beloit sued Zhongshan Broad Ocean in the United States claiming Zhongshan Broad Ocean etc. infringed their four U.S. patents*
- *Sunshine IP assisted and fully participated in all the judicial procedures by working with Law Firm in the U.S*
- *Reached a very favorable settlement on behalf of Zhongshan Broad Ocean*

Invalidation and Litigation cases

Trademark infringement and unfair competition disputes

Founded in 1995, Huizhou Heshi Cosmetics Co., Ltd.—a distinguished high-tech advanced enterprise in Guangdong Province—has built its reputation on quality, with its flagship product. When Zhengzhou Heshi Medical Technology Co., Ltd. initiated a series of trademark infringement and unfair competition disputes, Huizhou Heshi turned to Sanju Sunshine for strategic legal support.

Our team conducted in-depth market research, gathering evidence of Huizhou Heshi's long-standing industry presence. We demonstrated that its corporate name had gained substantial recognition among relevant publics and that the product packaging had established distinct market influence.

*The court ruled in favor of Huizhou Heshi: Zhengzhou Heshi was found guilty of trademark infringement and unfair competition, ordered to change its corporate name, destroy infringing stock, and pay **4x punitive damages**.*

Sunshine oversaw every step, from litigation strategy to swift execution of compensation, effectively clearing the market of infringing entities and fully restoring Huizhou Heshi's brand reputation.

YOHE 永恒 

Shielding Excellence: Sunshine's Campaign for Yongheng Helmets trademark

Established in 1993, Foshan Nanhai Yongheng Helmet Manufacturing Co., Ltd. stands as an integrated enterprise specializing in helmet R&D, production, and sales. As one of the first recipients of the "Famous Trademark of Guangdong Province," its products reach 22 countries and regions, embodying quality and trust.

*Entrusted by Yongheng Helmets, **Sunshine launched a comprehensive crackdown on counterfeiters and sellers, aiming to purge the market of infringing goods.** Through meticulous evidence collection and strategic litigation, Sunshine secured a pivotal court ruling: the "YOHE" trademark was recognized for its notable reputation, **with sellers found guilty of trademark infringement.** The sellers were ordered to cease infringement and compensate Yongheng Helmets for economic losses and reasonable expenses.*

This victory strikes at the heart of counterfeit sales, laying a solid foundation for subsequent efforts to target manufacturers and dismantle production hubs. It exemplifies sunshine's commitment to safeguarding clients' brand integrity through decisive, end-to-end IP enforcement.

Invalidation and Litigation cases

Protecting Industry Leaders: Sanju Sunshine's Action for Xiamen Tungsten Industryk

Xiamen Tungsten Industry, one of the large rare mineral enterprise groups established by the state, traces its roots to Xiamen Alumina Factory founded in 1958. It boasts a complete industrial chain from tungsten mines, tungsten-molybdenum smelting to processing and application.

The plaintiff's "金鹭" brand molybdenum wires enjoy high popularity in the industry. However, there have long been infringing products in the market, such as counterfeiting, passing off, and unauthorized labeling. Due to the scattered nature of infringement, these products failed to be effectively addressed.

*Through proactive monitoring, Sunshine detected over 10 shops on e-commerce platforms like Taobao, JD.com, and Pinduoduo selling infringing products, with the highest sales volume reaching nearly 1,500 pieces. **Sunshine then initiated litigations on grounds of trademark infringement and unfair competition, aiming to combat and trace the source of infringement, with a claimed compensation amount exceeding 4 million yuan.** This demonstrates Sunshine's proactive and professional capabilities in safeguarding clients' intellectual property rights through online monitoring work.*

“THE ART OF PATENT RIGHT VERIFICATION” PUBLISHED IN 2020

Oversea IP FTO for High Speed Train Braking Technology

- *Rely on Government Funding for Early Warning Projects*
- *Comprehensive analysis on global distribution of brake products and risks in Europe*
- *Comprehensive analysis on related European patent systems*
- *Comprehensive investigation of infringement risk*
- *This project provided risk prevention for the overseas output of China's high-speed train technology.*

Freedom-To-Operate case

FTO Projects for Desulfurization and Denitrification Technologies in Southeast Asian

Case Background:

In 2019, a large state-owned group entrusted Sunshine to conduct patent infringement risk early warning analysis for its desulfurization and denitrification projects in three Southeast Asian or Eastern European countries. The goal was to clarify whether the project technology might constitute infringement and ensure compliance with local laws.

Project Difficulties:

Based on the client's actual project situation, the work focused on Indonesia, Vietnam, and the Philippines. Due to the limitations of local official websites and restricted overseas access, it was difficult to directly obtain relevant patent texts through official channels, affecting the accuracy of infringement comparison.

Solutions:

- *obtaining basic patent information via official websites and commercial databases like incoPat and Derwent, and screened out risky patents.*
- *using local law firms to acquire the original texts of risky patents through official channels and confirm their legal status, ensuring accurate risk assessment.*

Project Results:

Through early FTO analysis, 4, 18, and 14 high-risk patents were identified in Indonesia, Vietnam, and the Philippines respectively, which helped the client to foresee the potential dispute risks in the targeted areas.
