Mellow is a mobile app designed with an aim to develop children’s financial responsibility and independence, targeting children aged 6 to 18 and their parents. The founders believe that money habits are formed in early childhood and children should learn to take control of their money early. Through connected parent-child apps facilitated by eWallets, it enables a child-driven learning process of saving regularly for goals, spending mindfully to understand necessity versus wants, and earning for rewards. Parents can guide children and stay notified with analytics, allowing children to learn early from small mistakes safely. Mellow is Alibaba JUMPSTARTER’s Top 12 Hong Kong Startups in 2018, and FinTech Award awardee.

**Niio** is reimagining the way humans interact with art in their everyday lives. Underpinned by a robust technology platform that powers the entire “digital art” ecosystem with dedicated management tools, Niio has amassed a global community of 3,500 leading artists, galleries and institutions who have stored and published over 11,000 high quality digital format artworks. Niio can then “port” this gallery-quality digital art onto any screen, anywhere by unlocking an entirely new form of consumption including streaming digital art via subscription or purchase.

Founded by Rob Anders and Oren Moshe, Niio launched its Asia arm in Hong Kong in April 2019, in addition to its operations in London, Tel Aviv and the United States. Growing its innovation-driven business internationally, Niio brings premium curated new media art to the city with a newly commissioned curated artwork catalogue that was announced at Art Basel and exhibited at a five-star luxury hotel. Its Hong Kong office currently adopts three Asian strategy including business development, marketing and sales.

Paktor, which means “dating” in Cantonese, started with the mission of connecting singles in Asia through a technology-enabled platform. The social networking app has quickly expanded beyond Singapore to the rest of Asia, forming one of the largest social dating networks in the region. Paktor believes in the strong potential of Hong Kong’s dating market because Hong Kong consumers are receptive to dating apps, their app spending per capita is higher than other Asian markets. In addition, Hong Kong is perceived as the lifestyle trendsetter in Asia, which makes the city a perfect location for expansion.

Paktor set up a team in Hong Kong to serve both online and offline dating needs, and is still expanding to support business growth. Paktor Premium (formerly known as HeyDouble), the offline dating service division, offers one-to-one matchmaking to create meaningful connections and successful matches for singles.

A joint research effort between Harvard University and Hong Kong University of Science and Technology has brought NeuronSpike Technologies Limited into fruition. It is a Hong Kong-based startup and currently supported by Hong Kong Science and Technology Park and Hong Kong X-Tech Startup Platform.

NeuronSpike is developing brain-inspired processor chips that are modelled like brains by mirroring neurons and synapses in the chip’s architecture. These cognition chips, being energy-efficient and computationally powerful like biological neural networks, can enhance artificial intelligence by imitating the flexible learning ability of human brains. The chips have the potential to transform autonomous driving and robotics industries.

The company is planning to launch its first product in two months and seek partnerships with Hong Kong’s research and development centres such as ASTRI in the near future. Currently it has four team members and two prominent advisor faculties in the team and plans to hire more Hong Kong and overseas talents specialising in engineering and neuroscience.
